### **DETAILED ACTION**

This Office Action is responsive to the Amendment filed on July 28, 2006. The Applicant has amended claims 1, 10, 18, 20; and canceled claim 19. Applicant has overcome the double patenting rejections. However, Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, this action is made final.

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4, 6-15, 17, 18, 20-26 are rejected under 35 U.S.C. 102(b) as being anticipated by Rusch et al., U.S. Pat. No. 6,130,175.

Rejection of claims 1-4, 6-15, 17, 18, 20-26 drawn to a polymeric membrane.

Rusch et al., teach an integral (col. 1, lines 9-11), substantially air impermeable polymeric membrane comprising a polymeric sheet (col. 4, lines 42-47) comprising polymer and having a porous structure with a microstructure of fibrils (col. 4, lines 42-47), the sheet having distributed in the polymer: inorganic particulate, metal, organic polymer, or a combination, and the porous structure is at least partially filled with an ion-exchange resin to provide ionic conductance (col. 8, lines 41-56). It teaches a finely divided powder (col. 8, lines 41-56). It teaches the sheet has precious metal, or silica, or

Art Unit: 1745

titania, or carbon, or platinum distributed therein (col. 8, lines 41-56). It teaches the polymeric sheet is porous expanded PTFE (col. 3, lines 15-25). It teaches a polymeric sheet having a thickness of less than 50 microns (col. 4, lines 50-52). It teaches polymeric sheet has a porosity of 70-95% (col. 6, lines 49-55). It teaches the ion-exchange resin is fluorinated (col. 16, lines 29-45). It teaches the polymer has a cross-linked structure (col. 16, lines 29-45).

Thus, the claims are anticipated.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Rusch et al., U.S. Pat. No. 6,130,175 in view of Koslow, U.S. Pat. No. 5,147,722.

Rusch et al., teach a polymeric membrane as described above.

Koslow teaches a polymeric membrane comprising ion-exchange resin (col. 25, lines 15-35) wherein the polymeric sheet has silica or fumed silica distributed therein (col. 16, lines 65-67 and col. 17, lines 1-7).

Thus, it would have been obvious to one of ordinary skill in the art at the time the invention was made to insert the teachings of Koslow into the teachings of Rusch et al., because Koslow teaches that the addition of fumed silica can alter the stiffness of the membrane and improve the strength of the structure.

***Response to Arguments***

5. Applicant's arguments with respect to the pending claims have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
